We are a leading manufacturer of specialty valves for the pharmaceutical, chemical, petrochemical, power and related industries, headquartered in Germany with subsidiaries in China, India, Ireland, Italy, UK, USA

**Your next opportunity awaits – join us now in Eppstein!**

## Project Engineer (m/f/d)

We are offering a position as Project Engineer located in Frankfurt Rhine-Main Metropolitan Area. The Project Engineer will be responsible for quoting, planning, implementing and tracking valve engineering projects, ensuring they are completed on time and within budget. They will also provide technical expertise to internal and external stakeholders, including clients, suppliers, and contractors.

### Qualifications

- Bachelor's or Master's degree in Mechanical Engineering or a related field
- Excellent communication and interpersonal skills
- Strong problem-solving skills and attention to detail
- Ability to prioritize and manage multiple projects simultaneously
- Experience with project management software such as MS Project or similar tools
- Experience in the industrial valve industry is preferred
- Proficient in at least English or German, ideally in both

You would work in an international, diverse and open team with competitive salary, benefits such as private health care and a subsidized saving scheme.

If this challenge appeals to you, please do not hesitate to send your detailed application documents to our HR department:
