Quality Assurance Engineer (m/f/d)

This is a full-time on-site role for a Quality Assurance Engineer located in Frankfurt Rhine-Main Metropolitan Area. The Quality Assurance Engineer will be responsible for developing and maintaining quality standards in manufacturing to ensure that products comply with regulatory and customer requirements. They will collaborate with cross-functional teams to identify and resolve quality issues, implement new products and processes, and conduct root cause analyses to identify and prioritize improvement projects. You will be responsible to help the company achieve and maintain certifications such as PED, ISO 9001, TSG.

Qualifications

- Bachelor's or Master's degree in Engineering or a related field
- You must have certification to do VT, PT and RT level 2 inspections
- 3+ years of experience in Quality Assurance with a demonstrated track record of implementing quality management systems
- Experience with quality standards such as ISO 9001, ASME, and/or API Q1/Q2
- Proficient in statistical tools and techniques
- Strong knowledge of manufacturing processes, materials, and inspection techniques
- Excellent analytical and problem-solving skills, with the ability to prioritize and manage multiple projects simultaneously
- Strong verbal and written communication skills, with the ability to effectively communicate quality-related information to all levels of the organization
- Proficient in at least English or German, ideally in both

You would work in an international, diverse and open team with competitive salary, benefits such as private health care and a subsidized saving scheme.

If this challenge appeals to you, please do not hesitate to send your detailed application documents to our HR department:
